MEET THE TEAM
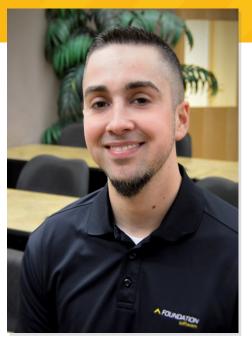

DAN ARNOLD
Consultant

Dan started with Foundation Software in 2013 as a client services representative where he helped answer client questions and resolve software-related issues. Shortly after, he parlayed this experience into his role as field trainer where he implemented and trained over 100 companies on FOUNDATION. During his time as a trainer he was able to fine-tune his efficiencies training and get a better understanding of the best business practices for Foundation clients.

His experience working as both a client services representative as well as a trainer also allowed him to meet regularly with clients on-on-one, which helped him transition into his current role in consulting. As a consultant, he works to make sure clients not only fully understand how to work effectively within FOUNDATION, but that they are getting the maximum utilization out of the software for their company.

EDUCATION

Bachelors in Management, Minor in Economics, Baldwin-Wallace

Speaking/Writing Experience

Before coming to Foundation, Dan worked closely with clients in the medical billing and coding industry.

FUN FACT

Dan loves to travel and has been to nearly 45 states!
